SCHOOL OF PUBLIC HEALTH

HEALTH PROMOTION & EDUCATION

Botswana like many other developing countries is faced with challenges of increasing incidences and prevalence of preventable diseases, both communicable and non-communicable. The advent of HIV/AIDS has negatively impacted the already over-strained health workforce, hence, the need to strengthen their capacity to effectively address these challenges.

Health Promotion and Education strategies remain pivotal in influencing individuals and communities to make informed choices related to their health. Unlike the curative model of health HPE implements cost effective interventions to help effectively prevent and control diseases and ill health within communities.

BSc Degree in Health Promotion And Education

The Degree in Health Promotion and Education is designed to provide students with learning experiences which will assist them to achieve desirable understanding, attitudes and practices related to critical health issues. This will enable them to completely impart knowledge and skills to the community; and by so doing increase the options available to populations to exercise more control over their own health, environment and to make the right informed choices. The programme is designed to enable graduates to effectively and efficiently assess community needs and design appropriate health interventions.

Duration : 4 years, full time

Admission : 36 points

Part 1 : Course work

Part 2 : Attachment & Research

Diploma in Health Promotion And Education

The Diploma in Health Promotion and Education is a 2-year full time course running through 4 semesters; spread over course work, research and a 13 weeks field attachment. This programme has its conceptual framework embodied in the Primary Health Care Model, of which the government of Botswana has committed itself to in order to promote the good health of its people. The programme is designed to enable graduates to work effectively and efficiently in a variety of settings such as District Health Management Teams, Schools, healthcare settings and non-governmental organizations.

Duration : 2 years, full time

Admission : 34 points

Part 1 : Course work, Research

Part 2 : Attachment

Certificate in Health Education Assistance

The Certificate in Health Education Assistance is a one-year, full-time programme conducted over two semesters. It combines comprehensive coursework with an industrial attachment, allowing students to gain both theoretical knowledge and practical, hands-on experience in real-world health education settings. Students will also develop competencies in communication, health promotion, and basic patient care, preparing them for entry-level roles in healthcare facilities, schools, and community health programs.

Duration : 1 year, full time

Admission : 30 points

Part 1 : Course work

Part 2 : Attachment

SCHOOL OF PUBLIC HEALTH

OCCUPATIONAL HEALTH & SAFETY

Boitekanelo College offers Occupational Health and Safety programmes designed to meet the needs of industries such as mining, construction and manufacturing. The programmes equip learners with skills to prevent workplace injuries and manage health and safety risks. Through practical training and industry attachments, students gain experience in hazard identification and risk assessment to promote safer and more productive workplaces.

BSc Degree in Occupational Health And Safety

The programme aims to build a pool of professionals who are capable of identifying, evaluating, assessing and controlling occupational hazards, risks and injuries to workers in all sectors of the economy. The programme will also hinge on protection of the environment and neighbouring communities. It further equips students with the skills to manage resources that are fundamental in the development of occupational health and safety plans and intervention programmes that promote wellness and safety at the workplace.

SCHOOL OF LEADERSHIP & MANAGEMENT

HEALTHCARE MANAGEMENT

The growing diversity of Botswana's healthcare system has created a demand for skilled healthcare managers in clinics, hospitals, insurance organizations, public health departments, universities, and research institutions. These professionals oversee areas like health information, medical staff relations, nursing, and patient care. The increasing healthcare demand, driven by the HIV/AIDS pandemic and other challenges, highlights the need for effective management. Advancing technology, limited resources, and rising expectations from consumers, policymakers, and regulators make healthcare management crucial in the rapidly evolving system.

BA Degree Health Care Service Management

The objective of the programme is to provide an education that is both intellectually challenging and directly relevant to the field of healthcare management. The programme is designed to provide students with concepts, models, techniques and examples relevant to healthcare management, which will enable them to improve the provision of care to patients.

Duration: 4 years, full time

Admission: 36 points

Part 1: Course work

The course exposes students to an understanding of medical records and its integral role to patient healthcare quality and effective health planning. Learners who enroll in this programme undertake various core modules to build their knowledge, skills and competencies for quality data collection, storage, retrieval, and use. To fulfill the requirement of the programme, learners must complete nine core modules, medical records project (Disease classification and coding) and work integrated learning.

Duration: 3 years, full time

Admission: 34 points

Part 1: Course work

Part 2: Attachment

HEALTH INFORMATICS

BSc Degree in Health Informatics

Earning a Health Informatics bachelors can help you gain a broad understanding of vital topics in health informatics and prepare you to take on high-level roles in a variety of healthcare settings.

Health informatics jobs are a combination of technology and healthcare. Professionals in this field help collect, analyze, and manage the data that healthcare organizations need to care for their patients. The health informatics field is diverse and expanding, with demand being fueled by the health care industry's focus on evidence-based medicine, quality improvement, and data security and accessibility for patients. Master's degrees also are common. Work experience in an administrative or a clinical role in a hospital or other healthcare facility is also common.

Duration: 4 years, full time

Admission: 36 points

Part 1: Course work

Part 2: Attachment & Research

SCHOOL OF ALLIED HEALTH

EMERGENCY MEDICAL CARE

Pre-hospital emergency care has traditionally been offered by ambulance drivers with very little or no medical education. In other settings hospital staff including nurses and doctors have offered emergency care primarily in inter facility transfers and planned patient transport. Recently health systems are beginning to incorporate structured emergency response systems with qualified emergency care personnel from recognized tertiary health institutions who can offer medical care and technical rescue to assist those who may find themselves in emergencies requiring urgent medical care and technical rescue. It is with this background that the Emergency Medical Care Department has designed programmes in the emergency medical field to provide an opportunity for those wanting to acquire qualifications in the emergency medical care profession.

BSc Degree in Emergency Medical Care

The 4 year Bachelor's Degree in Emergency Medical Care is designed to produce graduates who can manage patients requiring urgent medical attention using a wide variety of clinical procedures primarily in the out of hospital environment. The program develops graduates who are able to offer emergency care as independent practitioners, offer clinical governance, manage emergency medical and rescue services, play a role in emergency medical care education and add to the body of knowledge in the health sphere through engaging in research.

Duration : 4 years, full time

Admission : 36 points

Part 1 : Course work

Part 2 : Attachment

Diploma in Emergency Care Technology

This programme is intended to produce Emergency Care Technicians who can provide pre-hospital care as competent mid-level practitioners, effectively bridging the gap between the independent Emergency Medical Care practitioner and the supervised Basic Emergency Medical Technician. Their role is to assess, recognize and manage a wide range of medical and trauma emergencies within their scope of practice. The programme builds skills in patient assessment, emergency response, communication and teamwork, preparing graduates to deliver safe, effective care in high-pressure environments.

Duration : 2 years, full time

Admission : 34 points

Part 1 : Course work

Part 2 : Attachment

Certificate in Emergency Medical Care

The programme is intended to produce medical technicians who can provide basic medical care to patients requiring urgent medical attention. These basic emergency medical technicians are supervised with limited scope of practice.

Duration : 1 year, full time

Admission : 30 points

Part 1 : Course work

Part 2 : Attachment

Bachelor of Science in Hospital Administration

The Hospital Administration course equips students with knowledge and practical skills to manage hospitals and healthcare institutions effectively. It covers core management functions in healthcare, including planning, staffing, governance, finance, human resources, quality assurance, health information systems, and ethical and legal issues. The course emphasizes leadership, strategic planning, technology, and risk management to support efficient, high-quality healthcare delivery across public and private sectors.
